FIG. 9 is a cross-sectional view of a device in a first state, showing a piston (1) and a spring (30) in a compressed state. The device includes a housing (2) and a base (4). The piston (1) is positioned within the housing (2) and is connected to a rod (31) which is in contact with the spring (30). The rod (31) is also connected to a lever (32) which is pivoted at (33). The lever (32) is in contact with a contact point (34) on the base (4). The spring (30) is shown in a compressed state, indicated by the double-headed arrow.
